

SUMIMARK® SM3 Super Ribbon

MARKING RIBBON FOR USE WITH SUMIMARK III & IV MARKING SYSTEMS

RoHS/RoHS2 Compliant

FEATURES

- 1) SUMIMARK SM3 Super Ribbon is a pigmented ribbon that features optimum thermal transfer characteristics for use on the SUMIMARK III and IV Marking Systems.
- 2) SUMIMARK SM3 Super Ribbon, when used in conjunction with the SUMIMARK Marking System and SUMIMARK tubing, provides marks that, after shrinking, meet or exceed the print adherence requirements of SAE-AS5942. This standard replaces the cancelled SAE-ASA81531 document. *SM3 Super Ribbon is not compatible with earlier Sumimark Model 1 & 2 systems.*
- 3) SM3 Super Ribbon will yield exceptionally clean alphanumerics, barcoding, or graphics markings.
- 4) SM3 Super Ribbon is free from coating voids, skips, wrinkles, or other conditions which would adversely affect the transfer integrity.
- 5) SM3 Super Ribbon is required for marking on SumiMark SM-CM cable marker tags.

Standard Widths: 2", 3.25"

Standard Colors: Black only

Standard Package: 1,000 foot rolls

How to Order: (Type of material) (Width) (Color)

Example: SM3 Super Ribbon 3.25" Black
